

WHAT IS SPEAR?

Spear is an AI co-pilot that listens to your agents' sales calls in real time and tells them **exactly what to say** — NEPQ questions, objection responses, buyer psychology reads, and DISC personality coaching — while they're still on the phone. No more coaching after the fact. Spear coaches during the call, when it actually matters.

THE PROBLEM WE SOLVE

42%

of new agents quit within 90 days

68%

of coaching happens after the call — too late

\$0

extra cost to add Spear to your team

HOW IT WORKS

■ Real-Time Transcription

Spear listens live and transcribes every word — agent and prospect — with sub-second latency.

■ DISC Buyer Profiling

Identifies the prospect's personality type in real time — D, I, S, or C — and adjusts coaching to match.

■ Post-Call Report

Every call generates a full coaching report: score, key moments, what to say differently next time.

■ NEPQ Question Coach

Detects where you are in the call and surfaces the exact NEPQ question to ask next, with tonality guidance.

■ Objection Detection

Catches objections the moment they appear and gives the agent a word-for-word response before the silence gets awkward.

■ Financial Inventory

Built-in prospect profiler captures assets, income, existing coverage, and family situation on one screen.

WHAT AGENTS SAY

"I closed 3 deals in my first week using Spear. It caught an objection I would have fumbled and gave me the exact response. My close rate went from 18% to 31% in 30 days."

— Life Insurance Agent, Jacksonville FL
